

Global crossing has filed for chapter 11 and has left the employees' 401k plan worthless. The esimated value of the companies assets was approximately \$22 billion and is to be sold to forgein owners for \$250 million. Gary Winnick was once part of one of the companies planning to purchase Global Crossing Assets and is likely still connected to them. I feel this is not only a conflict of interest but a potential security risk for our country. Therefore I'm asking for your denial of approval for any associated license transfers and stop the sale of Global Crossing.
